

Visual identity

Colour palette

Our primary colour is Sage Navy. It is the most prominent colour in our brand and can be combined with three accent colours: Sage Highlight Blue, Sage Highlight Teal and the lighter Sage Pale.

CMYK and PMS values have been specified for printed materials and RGB and Hex for digital formats.

In Microsoft software such as Word, PowerPoint and Excel, use RGB.

Our colours can be used for headings and short text. Black should be used for longer body copy.

Sage Navy

HEX #D9EEFF

Visual identity

Colour palette: Navy vs Navy Tint

Sage Navy Tint is exclusively for use with the Sage logo, where our main navy can appear almost black.

Colour palette: Accessibility

In order to maintain legibility for all users we have rules about colour combinations.

At Sage we adhere to the Web Content Accessibility Guidelines (WCAG) AA standard – the international baseline for web accessibility, to ensure that people with disabilities can perceive, understand, navigate, and interact with our websites and other on-screen content.

The wrong combination of colours can lead to insufficient contrast for people with certain visual disabilities, making it difficult to perceive such content.

The colour chart on the right indicates which colours can be combined and what to avoid.

Please note: our website and platforms follow a separate UI Style Guide in terms of colour use and accessibility.
